<b>Office Action Summary</b>	Application No. 10/707,904	Applicant(s) WOODCOCK ET AL.	
	Examiner Victor Batson	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Specification***

The disclosure is objected to because of the following informalities: In paragraph [0030], "OLE\_LINK1the" and "FIG 3)OLE\_LINK1," is not understood.

Appropriate correction is required.

***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Reference number 121. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1 line 16, "the culvert" lacks proper

Art Unit: 3671

antecedent basis. In claim 2 line 3, the phrase "an auxiliary hydraulic" is not understood. Claim 3 improperly depends from claim 5 where it should depend from a previously established claim. The wording of claim 5 is unclear and grammatically incorrect. In claim 5 line 8, "the distal end of the inner arm" lacks proper antecedent basis. In claim 7 lines 2-3, "the telescoping arm member" lacks proper antecedent basis.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by Meeks (5,953,839).

Meeks discloses a culvert opening and cleaning apparatus including a telescoping arm member 24,52, a telescoping ram 70 mounted in a substantially parallel side-by-side relationship relative to the telescoping arm members, and including a culvert cleaning tool 50 and mounting bracket 69.

### ***Response to Restriction***

Applicant's election with traverse of Group I in the reply filed on May 25, 2005 is acknowledged. The traversal is on the ground(s) that Group I & II claims are closely related and don't pose a serious burden by requiring two separate searches. This is not found persuasive because clearly an excavation apparatus that could meet the structure

Art Unit: 3671

set forth in the apparatus claim (claim 1) would not inherently be used in the claimed method of opening and cleaning a culvert using a culvert cleaning tool as set forth in claim 9. Additionally, as set forth in the restriction filed 4/29/05, the inventions as claimed are distinct, and therefore the restriction is deemed proper regardless of their possible common utility.

The requirement is still deemed proper and is therefore made FINAL.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

### ***Inquiries***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Batson whose telephone number is (571) 272-6987. The examiner can normally be reached on Monday through Thursday.
